Personalized information in edit
profile fields

BUG LIST (NOT DONE)

Bug - Choose preference before
continuing.

Minor - Delay in uploading profile in
edit profile. Will pre-saving user prefs
@ login.onStop and then loading that
be faster? Less requests to DB as
well.

Todo - Update security options once
done developing.

FUTURE/FEATURE LIST

Consider converting back to
onClickListener, reasons in
description

Password reset

Delete user

Better toast messages

Wait times

"Tactile" buttons on click

Add more logs

SavedPreferences or user information
between activities?
