User Stories (Color Map)

User Story 1 - Matching System

User Story 2 - Confirmation

User Story 3 - Map Location

Bug

Scrum / Class

Future/Maybe

NOT DONE (feel free to add anything to help yourselves)

Task 1-2: Test preference matching queue system (3h)

Task 2-2: Implement confirmation through the database (5h)

Task 2-3: Design a confirmation notification or page (5h)

Task 3-2: Use location information to set my dining hall preferences to the dining halls nearest me (8hr)

Task 3-3: display some sort of map to the user, so they are able to find their meeting location. (13 hr)

DOING (feel free to add yourself to anything)

Task 1-1: Implement matching with preferences (21h)

Task 2-1: Design a confirmation protocol (3h)

TH

Task 3-1: learn the google map api so I can implement a location system. (13 hr)

DONE

BUG LIST (NOT DONE)

Bug - offline when Editing profile

Bug - User may still be considered online even though phone crashed.

Perf/Bug - should unsubscribe and resubscribe non-critical listeners

Style - How come we have xxxxReg, xxxxPw, etc for email/password on registration? Is this for security?

Todo - Update security options once done developing.

FUTURE/FEATURE LIST

Password reset

Delete user

Add more logs?

SavedPreferences or user information between activities?

Would be nice to have a Status type

Background tasks

DOC LIST (NOT DONE)
